

CLOUD SERVICE

Cloud Service is reliable, secure and simple way to connect remotely (over the Internet) to your vessel equipped with the Yacht Router. Cloud Service is available for all Yacht Router models (Micro, Mini, Standard and Pro). With Cloud Service you can easily connect to navigation and control systems, cameras, NMEA2000 networks or any other devices that use TCP/IP networks.

When you are connecting to your vessel via Cloud Service, you can choose Internet connection route that you want to use. That is very important. For example, when you are connecting to your vessel cameras, you want to be sure that you are not connecting via expensive Inmarsat satellite connection. Instead, you will choose to connect via 3G or WIFI connection.

Yacht Router can be used in combination with or as a replacement for GoFree™ (Simrad, B&G, Lowrance), Garmin WIFI Adapter Kit and similar WIFI modules. In combination with Cloud Service, Yacht Router is an unmatched solution that you are going to use frequently. and similar WIFI modules and other navigation programs that are using TCP/IP protocol. In a combination with Cloud Service, Yacht Router is unmatched solution that you are going to use frequently.

During the working day in your office, or in the evening while enjoying a dinner in a restaurant, with Cloud Service you can easily check your vessel cameras, or connect to navigation system to assure that your vessel is still anchored in the same place.

Description

Features

Number of IP devices that you can reach over Cloud service is not limited.

Each Yacht Router model have different number of available Cloud Service user accounts:

Yacht Router Micro: 1

Yacht Router Mini: 2
