

TOUCH SCREEN CONTROLLER

Touch Screen Controller is dedicated device that will provide the ability to setup Yacht Router and easily control wireless networks and Internet connections on your vessel. It is recommended for complex network installations with Yacht Router Standard and Pro.

- Replace dedicated computer for Yacht Router setup and control
- Compatible with all Yacht Router models
- 7" touch screen color display
- Single glass touch surface (IP65)
- Fanless design
- Wall and panel mount installation
- Maintenance-free, one-touch software update
- Power input 10-30 VDC or 110-240 VAC (via AC/DC adapter)

Compact design, single glass touch surface

Ideal solution for larger yachts.

Specifications
