

PRO SERIES 5

The easiest way to stay online.

Yacht Router Pro is designed for installation on larger yachts and boats with multiple satellite Internet sources. In combination with Add-on modules it will provide complete network solution for most demanding installations. Yacht Router Pro will provide the ability to establish nine Vessel Networks (e.g. Owner, Guests, Crew). For simple and efficient Vessel network distribution throughout the vessel you can use multiple Network Extender devices in various network topology (star, chain). Each Vessel Network can be simultaneously connected to same or different Internet source. For example: you can connect Owner network to the internet via VSAT, Guest network to the Internet over 4G mobile system while in the same time Crew network can access Internet over WIFI Hotspot in marina.

Performance

Fast, safe, powerful.

- Quad Core CPU
- 2x SAT port (for satellite Internet systems, ADSL, mobile routers)
- Mobile Expander Pro support (30+ NM long distance mobile connection, 4 SIM cards)
- Network Expander Pro support (24x GbE PoE)
- Optional WIFI Booster for long distance WIFI (10+ NM)
- Multiple Network Extender support (WIFI/LAN access points, PoE, chaining)
- 9x Vessel Network
- 8x Backbone Ethernet port (1 Gb/s per port)
- 1x SFP+ Backbone port (10 Gb/s)
- 19" rack and wall/desk mounts
- Hotel-type hotspot on 8 Vessel Networks

- Vessel Network bandwidth control
- Load balancing (dynamic user bandwidth allocation)
- Online Remote support
- Cloud Service
- Premium Service
- Free Remote Tracking and Anchor alarm
- Compatible with Garmin, Furuno, Simrad, Lowrance, B&G, Maretron, Sonos, Apple Airplay and other IP based systems

Long range WIFI and 3G/4G Connect far away from shore.

As an option to Yacht Router Pro you can add powerful WIFI Booster for long-range WIFI connection to shore WIFI networks (e.g. marina hotspot). With optional high gain outdoor antenna, you can expect up to 10 NM connection, even further in some conditions. You can also add up to four Mobile Expanders or single Mobile Expander Pro, device that will provide ability to connect to any 3G/4G mobile network far away offshore. With high gain outdoor antenna 30+ NM connectivity is expected.

User friendly control Simple for everyone.

The most important part of Yacht Router solution is Control application. Application is available for Windows, iPad, iPhone and

Android. Dedicated application is designed by professionals specialized in yacht communication systems in collaboration with yacht captains. The result is a system that is very simple to control and maintain.

Free GPS tracking and anchor alarm Let your family and friends know where you are.

With addition of NMEA to LAN converter, Yacht Router Pro s5 will support Remote Tracking and Anchor Alarm. With free Remote Tracking service, you can see the location of your vessel whenever it is connected to the Internet.

Remote support Support really matters. Sailors know that.

Whenever you have a problem setting up, or using your Yacht Router, our Support Team can remotely connect for help. No, need for dedicated software or subscription service, just a simple click on remote Support button in Yacht Router Control software.

Premium service Support for demanding clients.

If Internet is essential on your vessel, our Premium service will provide additional level of support in case of hardware or any system failure.
